English (proficient) and French (native)

WHO AM I?

My skills in 30 seconds:

- **Apps:** Flutter and React Native
- **Backends:** Node.js with PostgreSQL databases
- **DevOps:** Google Cloud Platform with Pulumi
- **Low level:** C++ programming, BLE protocols, and nRF52 microcontrollers
- **8 years of professional experience**

I am looking for my next role where I can join a new team and keep learning. Send me an email or connect on LinkedIn anytime. I'd be happy to chat.

Software engineering has been my passion since I was 14.

I built and maintain Weezem since 2021 with thousands of users.

For a different resume experience, check out my bento video website at https://hammerchmidt.com

MAJOR PROJECTS

2021
still ongoing

Weezem – CTO co-founder **Maintaining production & developing new features**
Social network. Engineered the entire app, servers and website.
https://weezem.com – Available on the Play Store and the App Store.
`Node.js & GraphQL & PostgreSQL / React Native w/ Expo / Google Cloud w/ Terraform / Stripe Connect / Webflow`

2021 - 2024

SPART
Sport app for employee well-being. Engineered the app and servers.
https://spart.life – Available on the Play Store and the App Store.
`Node.js & GraphQL & PostgreSQL / React Native w/ Expo / Google Cloud`

2024

Wifi Log Ingestion & Analytics
From raw Windows NPS logs to a full-featured dashboard that displays analytics on how often employees connect to Wi-Fi, per day, per client and per office.
`PostgreSQL / Google Cloud / Node.js`

January 2023

OpenGL Engine
A fun personal project to learn OpenGL. It features a fully modular ImGui interface, bloom, gizmos and more.
https://github.com/mhammerc/engine2 — Be sure to check the screenshots folder.
`C++ / ImGui / EnTT (ECS)`

2019 – 2020

Bugali
Engineered the first prototype of the project – extensive BLE programming, embedded development and the creation of an SFML engine that plays MP4 video files.
`C on nRF52 chips / BLE / SFML / FFmpeg C API / ImGui / Linux`

2018 – 2019

Monimalz
Engineered the software inside the Monimalz: all apps that run on the screen, communication with the React Native app, the Linux update process, and more.
https://monimalz.com – no longer sold
`Node.js / Linux / STM32 / Rust`

2016 – 2017

School 42
I studied 1 year at School 42, programming in C. "42 is a future-proof computer science training to educate the next generation of software engineers."
